

3rd Party Product Approvals

Let Primotek
take the
stress
away!

Managing product approvals with test houses and laboratories can be a time consuming and often very frustrating process.

In order to free up precious time and make the achievement of a pass and certification a reliable outcome, Primotek can undertake the management of the approval process on behalf of a client.

Primotek will manage the application process from application through to approval/certification including:

- Undertake initial product study
- Study product drawings and advise on the suitability of materials and components and the testing required
- Preparation and submittal of all application documentation
- Pay the laboratory fees on the client's behalf
- Liaise with the test house on a regular basis
- Manage the application to final approval and certification

Typical Approvals:

DWI
(Drinking Water Inspectorate)

WRAS
(Water Regulations Advisory Service)

BS6920

EN331
(Ball Valves for Gas Service)

National Grid (Transco)

Customer Approvals

Overseas Markets
(International)

Look what Primotek can approve for you!

3rd Party Approvals are often mandatory to enable product sales in MANY markets

Application and approval processes are often time consuming and frustrating

Primotek has EXTENSIVE experience managing product approvals

Existing approval portfolios can also be managed to ensure deadlines are not missed when re-certification becomes due

Primotek will:

- Undertake initial product and approval studies
- Advise on the suitability of materials and components and the testing required
 - Prepare all application documentation
- Manage the application through to final approval
